From: Florin C. SUCIU, CEO STAS, LLC Las Vegas, NV USA

Att: Mr. Ulrich Körner, CEO of Credit Suisse Bank

Subject: Project LOTUS

Dear Mr. Ulrich Körner,

We offer you the ONLY ONE PROPRIETARY electronic transactional platform "STAS NETWORK", with ZERO MARGINAL TRANSACTIONAL COSTS, and a potential 1Billion accounts with REAL TIME TRANSACTIONS administrate on 1 BIN! Our Platform is fully adaptable to the new ISO 20022, and all Basel regulations, and can offer THE FIRST REAL DIGITAL CURRENCY, both for Euro and Dollar, and the solutions for the European Union's drastic needs now, and for the MENA countries(platform's main target), and THE ZERO TRANSACTION COSTS for global money transfers, and for the HNWC that Credit Suisse is trying to keep it, and more get it from other banks.

I can assure you that our LOTUS Project, can bring a fresh vision and the latest fin-tech that Credit Suisse needs now, and for the next years. What we offer is UNIQUE and DESIRABLE now in the global financial markets, and we can make it to be Credit Suisse's proprietary. Then, Credit Suisse can sub-license the "newly developed platform", to all the banks in the world, mostly for ones affected by the new global transactional situation. Credit Suisse, can become THE FIRST BANK WITH ITS OWN GLOBAL ELECTRONIC TRANSACTION PLATFORM, FOR THE FUTURE NO CASH SOCIETY! That will move, definitely the stock value up!

We were on the international fin-market back in 2005-2015, integrated with US banks, and in 2015 we developed the first "Q" DIGITAL CURRENCY, as an index of the top 10 currencies, and Gold value in real-time. The time has come, for us to be present again on the international market, and for that, we need a first bank, which we hope to be Credit Suisse, that can help us develop our API to the latest financial market needs and future integration with the Global Credit Suisse network. In the LOTUS PROJECT presentation, we have TRANSYSALL IstasBUL Turkiye Project (for the NEW GLOBAL MARKET both commodities, and currencies), where our "Q DC" can become the solution for international commercial transactions needs(now with the war, recession, inflation, HNWC assets restrictions, and more. Also, we developed the REDUTA e-government solution for European Emerging countries(Romania, Bulgaria, Turkiye), and for the DREAMS and DESIRES of the ECB and EU to get rid of the VISA & MC costs (since they launched the Monnet project back in 2008, but not completed...).

I'm fully convinced that if the management and marketing of the LOTUS project will be done right, by us and Credit Suisse, we can fulfill our project to get Credit Suisse's stock value back to 18,56 CHF for the 165 anniversary in 2023!

Yours trully,

Florin C. Suciú
