To whom it may concern,

TRANSYSALL LOTUS PROJECT 2023-2025

UNIQUE features of our STAS NETWORK global platform for future of banking and digital electronic transaction

1. The “stas network” digital-financial platform is the only one on the international market that has **"zero marginal transactional costs"**, and can give absolute and in real time control to clients over their accounts and financial transactions, guaranteeing the development of a proprietary transaction platform (LOTUS) for C2C, C2P, P2P, P2G, G2P, C2G based on our Q Digital Currency. Thought a different marketers solution we can develop and administrate till 1 billion accounts on 1 BIN, in real time! Our TRANSYSALL LOTUS project includes an initial network of 5 BINs globally.

2. STAS NETWORK API was developed of starting from a USA financial institution, as a MAIN PLATFORM (DATA CENTER), and as a base for future administration of all globally divisions, that will developing the ONLY one Global Digital Currency (QDC) based on our proprietary "Q digital currency index", which will be the base of the future digital NO CASH SOCIETY back-up by gold, and a main part into the forth digital industrial revolution globally.

The support for this project is based on TRANSYSALL (Transactional System Alliance), a new type of Feeder Trust Fund for International digital transaction back-up by gold, and Sovereign Bearer Gold Bonds. Our future Q Digital Currency will be the first one based on an Actual Index of Top 10 currencies and Gold value in real time, and including the new "Energetic Sustainable Country Index" developed by us.

3. Stas Network platform, is also the "core platform" for REDUTA e-goverment solution, for Real-time management of all economic and social activities in the emerging countries (tax collection, pay to and from the population without delay, integration of the citizens outside the country into the system of taxes and duties). Our developed REDUTA e-government platform will reduce the current State's and Companie's high cost to third parties for all transactions for incomes, payments, payrolls, pensions, allowances, transfers of money in the country and abroad and many others and will NO LONGER pay ANY VISA and Master Card transactional costs (The solution for the EU's Monnett Project).

WE WILL BRING THE FUTURE TO YOU, TODAY!

Our REAL TIME ZERO MARGINAL TRANSACTIONAL COSTS platform, will solve The NEEDS IN MARKETING AND DIGITALISATION OF BANKING SYSTEMS, and management for High Net Level Clients financial assets, both for private and public-private projects! The main purpose of the project is to solve the main global financial problem of the Bubble Fiat Currencies and Commodities and services transactions, and allow governments and corporations which are struggling under the Association(VISA&MC), SWIFT and FED's fiat dollar control", and their "Quantum Financial System" that want to "impose globally" starting with 2023.

The project will be able to offer a full control in real time for all participants to the TRANSYSALL LOTUS platform (Partners, Associates, Clients and Marketers, for specifics merchants and HNLC, and for all the local and international transfers by offering our facility proprietary "money transfer" platform with ZERO commission, thorough the development of our new types of PROPRIETARY technologies (i-Swipe K, pPOS, pPhone, marketers cards)! TRANSYSALL LOTUS will change the monetary and banking system as it was, moving to a REAL GOLD BACK-UP DIGITAL ECONOMY with "zero marginal transactional costs", that's UNIQUE and is THE ONLY solution to move forward with the integration of the principles of the future NO CASH digital society in all administrative and economic activities. This will reduce the use of cash and costs for the governments, corporations and public for their payments, and offer support for high level private clients and companies for the continuous development and attraction of funds through the UNIQUE TRANSYSALL COIN (TRANSYSALL Club Of Investors Network). The STAS NETWORK platform will be develop as NEW integrated solution that can be instrumental in managing in real time the necessary accounts for all types of clients, with zero marginal transactional costs for the transfer of funds into the system. Note: stas network platform may be fully integrated with both VISA&MC platforms, and our cards works in their networks, having The International Assessments Fees they charge for cash).

TRANSYSALL LOTUS is The Project for the NEW international financial markets NEEDS(that can also help build BRICS system), and we will start with TRANSYSALL IstasBUL, as a MUST for our LOTUS GLOBAL NEW TRANSACTIONAL PLATFORM for Currencies, commodities, services, oil and energy, with the support of our Q DIGITAL CURRENCY financial transactional solution!

A full presentation of the project is available for future partners, associates, clients, marketeers, both for private and governments entities.
